

Urologic Nursing

Guidelines for Authors

Send your query or manuscript to *Urologic Nursing* today!

Urologic Nursing, the official journal of the Society of Urologic Nurses and Associates, Inc. (SUNA), is a peer-reviewed journal that welcomes the submission of original manuscripts pertinent to the practice of urologic health care professionals. Unless clearly specified, the views expressed in articles, editorials, and letters published in *Urologic Nursing* represent the opinions of the authors and do not reflect the official policies of SUNA.

The journal accepts original articles: case study, clinical practice, continuing education, patient education, systematic review of the literature, quality/performance improvement, and research. Specific templates for many types of manuscripts are available online (www.suna.org/unj). Query letters are welcomed, but not

required. Material must be original and never published before. Material is submitted for review with the understanding that it is not being submitted to any other journal simultaneously. An electronic copy of the manuscript should be submitted to the editorial office.

Urologic Nursing is a refereed journal. All manuscripts submitted undergo review by the editor and blind review by members of the manuscript review panel and/or editorial board. Each manuscript is evaluated on its timeliness, importance, accuracy, clarity, and applicability to urologic nursing. Upon acceptance of the manuscript, the author will yield copyright to *Urologic Nursing*. Manuscripts accepted are subject to copy editing. The author will receive proofs for review prior to publication.

Manuscript Preparation

Manuscripts must be typed and double-spaced. Style should follow the *Publication Manual of the American Psychological Association* (6th ed.). As a general rule, manuscripts should be saved as MS Word documents. Use the author-date method of citation within the text, e.g., (Doe, 2016) or "Doe (2016) states...." With multiple authors, the first citation must list all authors, and subsequent citations should list only the last name of the first author and et al. (Doe et al., 2016).

Acquiring permission to reprint previously published materials is the responsibility of the author.

Format of Manuscript

Title Page: Include the manuscript title, authors' names, credentials, and job titles and affiliations. Also include a brief abstract of 40 words or less along with an address for correspondence, day and evening phone numbers, fax number, and email address.

Text: Double-space all typing, using 1.5-2 inch margins. Include title or short descriptor on top of each page, but do not include the author's name. Use only common fonts (Times, Universe, Helvetica, Courier, etc.) and avoid complex font attributes such as outline.

Subheadings: Include subheadings in the manuscript where possible. The first three levels use bold font. Italics are not used unless there are more than 3 levels of headings:

Level 1 Example

Centered, Boldface, Uppercase and Lowercase Heading

Level 2 Example

Flush Left, Boldface, Uppercase and Lowercase Heading

Level 3 example.

Flush left, boldface, lowercase heading ending with a period.

Level 4 example.

Flush left, italicized, lowercase heading ending with a period.

Figures: These include line drawings, photographs, diagrams, and graphs. Each figure should be numbered, and the number must correspond to a statement in the manuscript directing the reader to see such figure (see Figure 1). Include a separate legend sheet with captions. When using figures reprinted or adapted from another source, the author must obtain written permission for both print and electronic use from the original publisher.

Tables: Construct tables using the "Draw Table" tool in MS Word or create tables in an Excel spreadsheet. Do NOT place tables inside a separate text box, and do not use tabs to create columns of text.

Photographs: Camera-ready photographs may be black and white or color. Photos should be glossy, 5 x 7 inches. Electronic files (JPGs) must be in high resolution, 300 dpi.

Please note: Images found on Google, Bing, or other Internet search engines are not public domain; permission from the original source must be provided.

References

List all references (only those cited within the text) in alphabetical order. All citations should reference primary sources. The use of secondary sources (material analyzed or interpreted from the primary source) is discouraged. If necessary, locate a copy of the original work and credit it as such. Authors are encouraged to provide the digital object identifier (DOI) number for

all references when possible directly after the citation. Manuscripts must NOT contain reference software codes.

Citing Multiple Authors: In-text citations with six or more authors should include the first author followed by et al., even in the first citation.

In the list of References, if there are eight authors or more, list the first six, then an ellipsis, then the last author. If there are seven authors, list all seven.

Websites: It is not necessary to include the date a site was accessed, unless the material will change over time.
